

ORO Onboarding Platform - Dev Spec

What We're Building

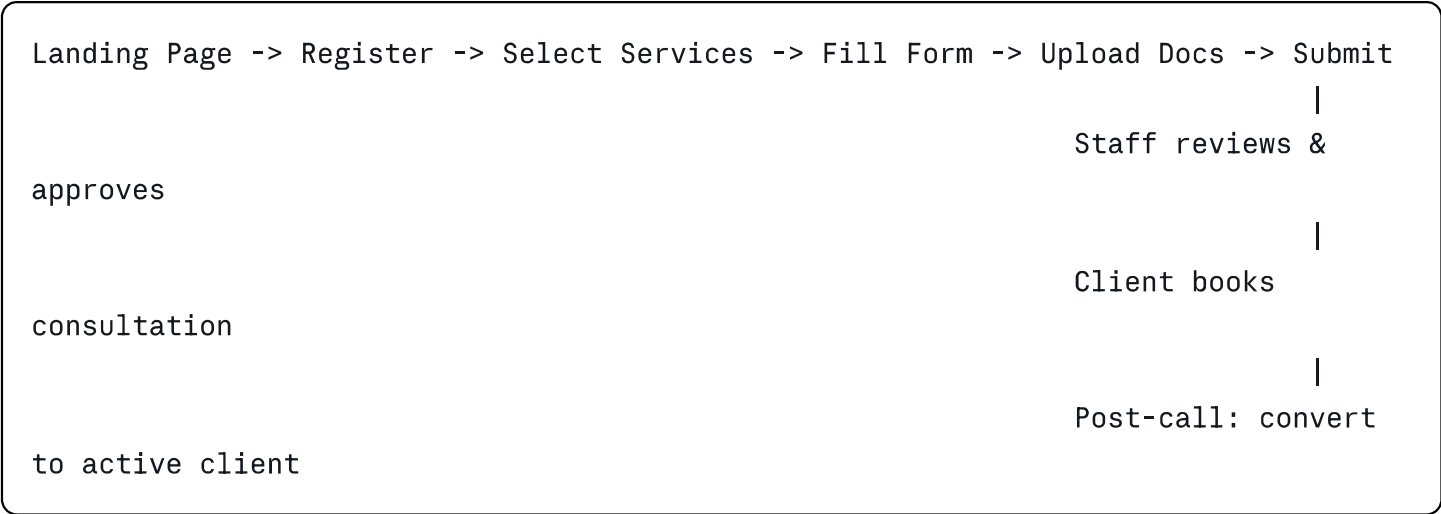

A client onboarding portal for a Cyprus corporate services firm. Prospects must submit their info and documents before they can book a free consultation. This replaces the current flow where anyone books a calendar slot and half of them ghost.

Previous attempt (crprt.com) failed - built 70+ pages on a no-code tool, nothing worked. We're doing the opposite: focused MVP, custom build.

User Roles

Role	Access
Prospect	Public pages, registration, onboarding form, document upload. Cannot book until approved.
Client	Everything above + booking, dashboard, messages. Converted from prospect post-consultation.
Staff (Admin)	Submissions queue, review/approve, client management, analytics, content editing, full access.
Partner (Lawyer/Accountant)	Read-only on assigned clients - profile, documents, notes. Cannot approve/reject.

Core Flow

Pages & Components

Public (No Auth)

- Landing page, Why Cyprus, Services, How It Works - standard marketing pages, nothing complex. Content-driven, SEO matters. Skip detailed spec - just match the existing orocorporateservices.com content and structure.

Auth

- Register: name, email, phone (with country code), password. Google + LinkedIn OAuth.
- Login: email + password. Forgot password flow.
- Email verification required before proceeding.

Onboarding (Auth Required) - THIS IS THE CORE

Step 1 - Service Selection

- 6 service cards: Company Formation, Accounting & VAT, Tax Residency (Non-Dom), Immigration, Licensing, Banking Solutions
- Multi-select, at least one required
- Selection drives which fields appear in Step 2

Step 2 - Qualification Form (Dynamic)

Always shown:

- Full legal name (as on passport)
- Date of birth
- Nationality (country dropdown)
- Country of current residence (country dropdown)
- Current address
- Business description / intent (textarea, min 100 chars)
- Expected annual turnover: Under 50K / 50K-200K / 200K-500K / 500K-1M / 1M+ (EUR)
- Timeline: Immediately / Within 1 month / 1-3 months / Just exploring
- Source: Google / Referral / Social Media / Event / Other

Conditional fields by service:

Service	Extra Fields
Company Formation	Proposed company name, business activity type, number of shareholders, nominee services needed (bool)
Tax Residency	Current tax residency country, 60+ days in Cyprus (bool), employment status
Immigration	Permit type (work/PR/digital nomad), family members count
Accounting	Existing Cyprus company (bool), reg number if yes, accounting software, monthly transaction volume
Banking	Account purpose, expected monthly volume, main counterpart countries
Licensing	License type (CySEC/CBC/etc), current jurisdiction, existing licenses

Save draft functionality - don't lose form state.

Step 3 - Document Upload

- Passport / National ID (required) - PDF, JPG, PNG, max 10MB
- Proof of address (required) - utility bill or bank statement, under 3 months old
- Additional documents (optional)
- Drag & drop, progress indicator, preview, remove/re-upload
- Encrypted at rest, EU storage, GDPR compliant

Submission -> confirmation screen with reference number (format: ORO-2026-XXXXX), estimated review time 24-48h

Client Dashboard (Post-Submission)

Sidebar nav: Dashboard, My Application, Messages, Documents, Book Consultation (locked until approved), Settings

- **Dashboard:** Welcome banner, application status card with timeline (Submitted > Under Review > Approved > Consultation Booked), upcoming consultation, recent messages
- **Messages:** Thread with ORO team. File attachments. Email + in-app notifications on new messages.
- **Documents:** Uploaded docs with status per doc (received / under review / approved / re-upload needed). Upload additional.
- **Book Consultation** (unlocked on approval): Calendar showing available slots for next 2 weeks. Timezone auto-detect. Expert selection (name, specialization). Confirmation with calendar invite (.ics). Automated reminders at 24h and 1h before (email + WhatsApp).

- **Settings:** Edit profile, password, notification prefs, language (EN/RU).

Admin Dashboard

Submissions Queue

- Table: Reference #, Name, Services, Country, Date, Status, Actions
- Filters: status, service type, date range, country
- Search by name/email
- Status options: Pending Review / Approved / Needs More Info / Rejected

Submission Detail

- Left: full profile data + document viewer with inline preview + download
- Right: status controls, assign to partner dropdown, internal notes (timestamped, attributed), activity log
- Actions: Approve / Request More Info (with predefined checklist + custom message) / Reject

Client Management (Lightweight CRM)

- Convert approved prospect to active client (one-click post-consultation)
- Client list: name, company name, services engaged, assigned partner, next key date, status (Active/On Hold/Completed)
- Client profile:
 - Services engaged as cards: service name, status (In Progress/Completed/Pending), start date, assigned partner
 - Key dates & reminders: annual returns, VAT filings, license renewals, permit expiries. Status: upcoming/overdue/completed. Manually addable.
 - Documents in folders by service type
 - Consultation history with notes
 - Internal notes thread
 - Activity log
 - Assigned team management
 - Quick actions: Send Message, Request Docs, Add Service, Add Key Date

Bookings View

- Calendar of upcoming consultations
- Link to prospect/client profile from each booking

Analytics (Simple)

- Submissions count, by service, approval rate, avg time to consultation, no-show rate, top countries

Partner Portal

- Assigned clients list (read-only)
- Client profile + documents
- Internal notes (can add, can view staff notes)
- Cannot approve/reject/change status

Integrations

What	Options	Priority
Auth	Supabase Auth or NextAuth (Google + LinkedIn OAuth)	P0
Email	Resend or SendGrid (verification, confirmations, reminders)	P0
File Storage	Supabase Storage or Cloudflare R2 (encrypted, EU region)	P0
Calendar	Cal.com API (embeddable, timezone handling)	P0
Database	PostgreSQL via Supabase or Neon (RLS for multi-role)	P0
WhatsApp	Twilio or WhatsApp Business API (reminders)	P1
Calendar Invites	Google Calendar API + .ics generation	P1

Suggested Stack

- **Frontend:** Next.js + Tailwind CSS
- **Backend:** Next.js API routes (or separate Express if preferred)
- **DB:** PostgreSQL (Supabase)
- **Auth:** Supabase Auth
- **Storage:** Supabase Storage / Cloudflare R2
- **Hosting:** Vercel
- **Email:** Resend
- **Calendar:** Cal.com
- **Analytics:** PostHog

Data Model (Key Entities)

users

- id, email, password_hash, full_name, phone, role
(prospect/client/staff/partner)
- email_verified, created_at, language_pref

prospects

- id, user_id, reference_number, status (pending/approved/needs_info/rejected)
- services_selected (array), created_at, reviewed_at, reviewed_by

prospect_details

- prospect_id, field_name, field_value
(flexible key-value for dynamic form fields per service)

documents

- id, prospect_id, type (passport/proof_of_address/other), file_url
- status (received/under_review/approved/reupload_needed), uploaded_at

clients

- id, user_id, prospect_id (origin), company_name, status
(active/on_hold/completed)
- primary_staff_id, created_at

client_services

- id, client_id, service_type, status (pending/in_progress/completed)
- assigned_partner_id, start_date, notes

key_dates

- id, client_id, description, due_date, status (upcoming/overdue/completed)

messages

- id, prospect_id/client_id, sender_id, body, attachments, created_at

internal_notes

- id, prospect_id/client_id, author_id, body, created_at

bookings

- id, prospect_id, expert_id, datetime, timezone, status
(confirmed/completed/no_show/cancelled)
- reminder_sent_24h, reminder_sent_1h

activity_log

- id, entity_type, entity_id, action, actor_id, created_at

What's NOT In Scope

- Full CRM (pipeline, deal tracking, lead scoring)
- Invoicing / payments
- E-signatures
- Task management
- Blog / content management beyond basic text editing
- AI chatbot
- Multi-jurisdiction support
